Chung-Hau Wang

2620 Severance St. Apt.4 · Los Angeles, CA 90007 · (213)359-9740 · chunghau@usc.edu

OBJECTIVE

Software Engineer/ Software Developer—Internship/ Entry Level Full-Time Position

EDUCATION

University of Southern California (USC), Los Angeles, CA — Dec 2013

Master of Science, Mechanical Engineering (Specified in Control and Design)

National Chung Cheng University (CCU), Chiayi, Taiwan — 2007

Bachelor of Science, Mechanical Engineering

Moscow Aerospace School's 2005 Program, Russia — Sep 2005

TECHNICAL SKILLS

Visual C++, Java, Visual Basic, Python, MatLab, SolidWorks, AutoCAD, Verilog, and MS Office

WORK EXPERIENCE

Grader for Engineering Vibrations I

USC, Los Angeles, CA — Jan 2013-May 2013

Directing Officer (Military Service)

Level A Ordnance Repair Depot, Combined Logistics Command, DOD, Taiwan — Jul 2007-Jun 2008

- Managed the repair technicians and maintained the armament (rifle, artillery, telescopes, etc.)

PROJECT EXPERIENCE

Regenerative Speed Reducer (RSR):

This project is to design a device to collect and transform vehicle's kinetic energy to electrical power

- Designed the prototypes, the configuration, and the materials for each component
- Analyzed the model by finite element analysis (FEA) with COSMOSWorks package in SolidWorks

Computer-Aided Design of Mechanical Systems

This project is to analyze different models by FEA with COSMOSWorks package in SolidWorks

- Analyzed the stress/strain and their distributions, the vibration natural frequencies and the corresponding vibration modes, the buckling boundary conditions, and thermal stress/strain for different models

SpaceBot

This project is to design a Geosynchronous (GEO) satellite life-extension vehicle

- Determined the required propellant masses, scales of SpaceBot and its subsystems
- Evaluated the feasibility and the cost for the whole project

Da Vinci Flyer

This project is to reconstruct Da Vinci's flyer

- Designed the model and determined the flyer's scales, flying modes, and the feasibility with SolidWorks

Modeling and Analyzing Vibrating Systems

This project is to analyze the vibrations of lump-mass systems and continuous systems using **MatLab**

- Modeled and analyzed a suspension system model of automobiles and a model of airplane wings with mounted engines.

HONORS & AWARDS

First Place (Work Name: Running Chair) Oct 2006

2006 Taiwan Innovative Mechanism Design Competition

EXTRACURRICULAR ACTIVITIES

Club for Initiative Design & Engineering CCU, 2004-2007

Club of Taijiquan (a soft Chinese martial arts) CCU, 2003-2007
