Mechanical Engineer

A growing leisure products manufacturing company with more than 500 employees is looking for a dynamic Mechanical Engineer to be responsible for the design, evaluation and modification of pump and pump design.

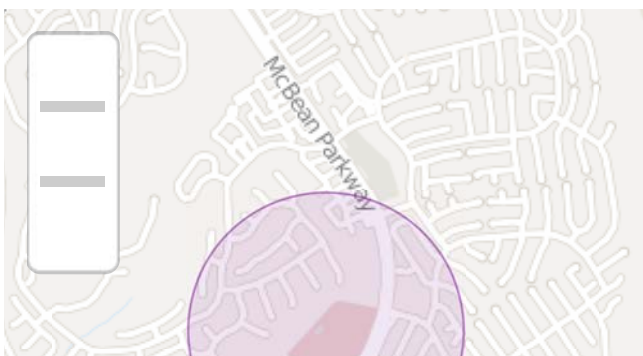

You will be responsible for:

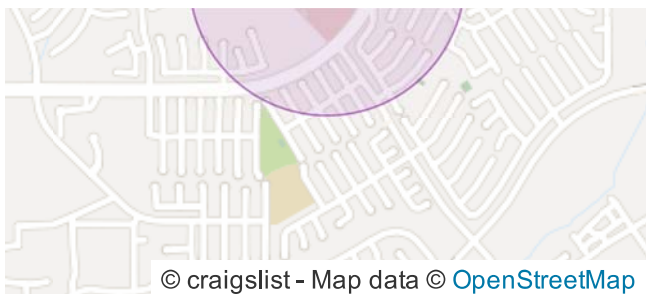

- *Design, develop, implement and document new products using 2D & 3D CAD software
- *Provide support of sustaining and new product issues in Manufacturing and in the field
- *Develop BOM's and assembly drawings to allow for a smooth introduction of new products from design to manufacturing
- *ECO generation, review and implementation support
- *Address manufacturing issues and support prototype/system pre-production builds
- *Support, direct and mentor design engineering and manufacturing engineering person
- *Foster Continuous Improvement and drive towards world class engineering practices and design methods
- *Support continual cost reductions efforts
- *First Article reviews, design reviews, MRB and CCB support

The ideal candidate will have:

- *BSEE with a min of 10 years experience in electronics packaging, injection molded plastic design and sheet metal part design
- *Computer Skills: Word processing, spreadsheet, AutoCAD, Pro E, Solidworks
- *Good verbal and written communications skills
- *Ability to multi task and prioritize a changing workload and work both independently and as part of a team
- *Possess problem solving skills, decision making, and have the ability to drive solutions to completion.
- *Ability to work with minimal supervision

Competitive benefits offering includes Medical, Dental, Vision, 401(k) with matching. Salary is commensurate with experience. No relocation package being offered for this position.
